

# Emission Factors for Toxic Air Contaminants of Concern to the Metal Finishing Industry

Data from the latest source tests conducted to document emissions associated with metal finishing operations are now available from the Metal Finishing Association of Southern California (MFASC).

This new 370– page report details emission factors developed from testing conducted in California’s South Coast Air Quality Management District (SCAQMD).

Covering work by MFASC and SCAQMD with input from the California Air Resources Board (CARB), the report will prove of special value for:

- USEPA Toxic Release Inventory Reports
- State/Local Agency Permit Applications
- Inputs to Dispersion Models
- Inputs to Health Risk Assessments
- Determining Compliance with Air Regulations

*For complete information on MFASC activities, call: (818) 986-8393*
