

Toxicological Review of Soluble Nickel Salts

The most up-to-date report on soluble nickel toxicity is now available from The Metal Finishing Association of Southern California (MFASC).

This new 250-page report, sponsored by US EPA, Health Canada, and MFASC, reflects the work of 15 esteemed authors and contributors as well as extensive external peer review by a panel of experts from government, academia, industry and consulting firms.

Prepared by Toxicology Excellence for Risk Assessment (TERA), the report presents the latest, unbiased consolidation of soluble nickel toxicity evaluations and provides scientific support for hazard and dose-response assess-

ments. The report also details the recommendations of a distinguished peer review board including:

- Dr. P. Michael Bolger, Food and Drug Administration
- Dr. James J. Collins, Solutia, Inc.
- Dr. Joyce M. Donohue, US EPA
- Dr. Joseph Fedoruk, University of California, Irvine
- Dr. Ernest Foulkes, University of Cincinnati
- Dr. Ernest Mastromatteo, University of Toronto
- Dr. Ann G. Schwartz, Allegheny University of the Health Sciences
- Ms. Donna J. Sivulka, Consultant
- Dr. Allan H. Stern, New Jersey Department of Environmental Protection
- Dr. John S. Wheeler, Agency for Toxic Substances and Disease Registry
